

The Management of THUNE EUREKA S.A., being aware of the transcendence that the prevention of pollution and occupational hazards has for the development of its activity of "**Design, Development and Manufacture of Industrial Machinery. Machining, Welding and Surface Treatments**", establishes the following Policy in order to eliminate, reduce and / or control Occupational Risks, improve the protection of the health of the workers and those who come into contact with the Organization and prevent environmental contamination:

- Maintain at all times the concept of continuous improvement in all internal processes, especially those that affect the safety of workers and the pollution prevention.
- Ensure compliance with the legislation and regulations applicable to the Environment and Prevention of Occupational Risks, as well as other requirements acquired by the organization.
- Promote the participation and responsibility of all workers of this company in the operation of the Management System and in the development of this Policy.
- Establish the necessary measures to avoid, eliminate or minimize all the factors that generate significant Environmental Aspects or imply risk for the Company's personnel, other interested parties or for society in general.
- Promote among our suppliers compliance with all the provisions established by the company in matters of Health, Safety and Environment.
- Manage our waste in the most environmentally friendly manner, encouraging reuse and recycling practices whenever possible, in order to prevent contamination.
- Contribute to the care of the Environment by minimizing emissions, discharges and soil contamination, promoting and encouraging the rational consumption of natural resources.

The Management of THUNE EUREKA S.A., being aware that the operation of the Management System is the task of all workers, is committed to:

- Achieve the Health Safety and Environment objectives of with the same interest with which the economic and social objectives of the Company are pursued.
- Periodically review the Occupational Risks associated to the processes and/or activities as a fundamental element of the protection of the workers, as well as the updated maintenance of the evaluation of Environmental Risks.
- Adopt all necessary and economically viable measures to eliminate, reduce and/or control Occupational Risks, as well as our impact on the Environment.
- Maintain an open and objective dialogue with clients, subcontractors and workers in order to contribute to a better understanding between the parties and improve the behavior with respect to the Prevention of Occupational Risks and the Environment. The collaboration with the authorities is based on a cooperative predisposition that includes emergency plans.
- Communicate this policy to all personnel working for or on behalf of this Organization, as well as interested parties as deemed appropriate.
- Continuously improve our actions in the field of Environment and Occupational Safety.

To comply with this, the General Manager establishes and documents quantifiable objectives and goals on an annual basis. This Environmental and Occupational Risk Prevention Policy is reviewed annually by the Management to ensure that its content is consistent with the Organization's Policy and Strategy.
